

ACCESSORIES

ALARMS

28009 -

Unfortunately, golf cars can be an easy target to thieves. If you've invested a lot into your golf car, you'll want to take measures to protect it. The affordable ENFORCER Universal Alarm System functions just like a car alarm to keep your golf car secure. If you use your car in public places, this product is a necessity.

- Real automotive-style alarm
- Includes two key fobs (remote controls) with the following functions: arming, disarming, and panic mode
- Audible arm/disarm option, you can change the settings so that the car lights up and beeps when you arm or disarm the alarm, making it easier to find at night or among a lot full of other cars.
- Includes and LED light that mounts in your dash to let you see if the alarm is armed or disarmed
- Extremely low power draw; it won't drain your battery
- Includes wiring harness, connectors, security box, two key fobs, all hardware, and installation and operating instructions.
